How I Calculate 431 Grades for Fall 2024

Your [Course Grade](#) is based on the following components:

Component	Points	Details
Lab 0	10	*Everyone received the full 10 points*
[Labs 1-6](#)	250	Sum of your five best scores (each out of 50) *Most students score 210-240 here*
Lab 7	25	Due 2024-12-03 at noon [Grading specifications are here](#)
Minute Papers	40	Sum of scores across the 8 minute papers *See Student Grade Roster (all scores in 37-40)*
Project A	120	Scored out of 120 points
Project B	150	15 points for registration form (*everyone got 15*) 60 points (combined) for Canvas materials 60 points for oral presentation 15 points for self-evaluation
Quizzes 1 and 2	230	Each Quiz initially scored out of 100, so we multiplied each by 1.15. Then multiply the better score by 1.2 and the worse by 0.8, and then sum those results.
[Class Participation](#) (not including bonus or Minute Papers)	25	Determined by Dr Love (includes questions in class, TA hours, Campuswire, non-bonus help) *Most students score 17-23 here*
Bonus Points	Up to 20	Includes numerous opportunities through the semester *Most students will score 0-10 bonus points*

Total Available Points This Semester: **850** (not including Bonus points)
Minimum Necessary Score for a B in the Class: **600** (70.6% of 850)
Minimum Necessary Score for an A in the Class: **725** (85.3% of 850)

[Lab Regrades](#)
- Students whose score (without referring to the [Lab Regrade Request Form](#)) is already an A in the course will not have their Labs reviewed.
- For all other students, if you have completed the (optional) [Lab Regrade Request Form](#) and requested additional points that *could* change your course grade, I will review your request. Otherwise, I will not.
